- Backend & Databases:** Node.js, Express.js, SQL, MongoDB (Basic Knowledge)
- Tools & Platforms:** Git, GitHub

PROJECTS

Smart AI Chatbot (*React.js, Gemini/OpenAI API, GitHub*)

- Built an easy-to-use AI Chatbot using React.js that talks to users in real time.
- Added a special feature where users can upload images, and the AI describes the image.
- Used clean and simple state management to handle messages and user data smoothly.

Weather Application (*React.js, Material-UI, Weather API*)

- Created a dynamic weather web app using React.js and Material-UI (MUI) to display live weather details for any location.
- Fetches real-time metrics from a Weather API, including current temperature, humidity levels, and "feels like" parameters.

Personal Portfolio Website (*HTML5, CSS3, JavaScript*)

- Designed a personal portfolio website to showcase my professional skills, experience, projects, and resume in one central place.
- Used clean and lightweight HTML and CSS layouts to make the website fully responsive and professional across all devices.
- Added smooth scrolling effects and simple interactive features using basic JavaScript.
